

About us

The National Climate Portal of Montenegro is a central hub for climate information, projects, knowledge, and financing opportunities. The portal connects institutions, experts, organizations, and citizens to support collective action towards a more climate-resilient and sustainable future.

Key benefits

Knowledge

A central hub providing access to reliable climate change information, documents, tools and resources.

Financing

Improved access to climate finance opportunities, funding mechanisms and project proposal calls.

exchange and stronger partnerships among key stakeholders.

civil society and the private sector to advance collective climate action.

Vision

The National Climate Portal is recognized as Montenegro's trusted national hub for climate information, knowledge exchange, and partnerships, connecting institutions, academia, the private sector, and citizens to support a climate-resilient, low-carbon, and sustainable future.
